

Individual Interest Presentations

The individual presentations will be given by one student alone. The student should speak about their topic for 5-10 minutes. For the presentations:

- Explain a hobby or interest that you have, but other students in the class might not know about (for example, explaining scuba diving would be good, but explain soccer would not be).
- Try to explain your interest so that other student can have a better understanding of it.
- Include any relevant information about the interest, such as time, cost, and equipment involved. You may also include any pictures or models if they will help.
- Speak only in English during the presentation time.
